

LABEL AND DECAL KITTING

STREAMLINED LABELING SOLUTIONS.

At ALG Labels and Graphics, we help simplify the labeling process by creating kits sheets or kit packages that can be delivered to the assembly line as a single unit for your manufacturing to label your products.

These kits, are a combination of branding, safety & warning, and instructional labels and decals that have been assembled and referenced under one SKU, simplifying your ordering and inventory processes.

PRODUCT-SPECIFIC LABEL SHEETS OR BAGS

- **Customizable Sheets:** Product-specific label sheets with different part numbers can be created, allowing all decals for a piece of equipment to be in the same place.
- **Bag Kits:** We can also place decals into a plastic bag instead of a printed sheet. This approach allows for the use of multiple material types, providing greater flexibility and variety compared to the single material option when running sheets.
- **Easy Installation:** This reduces the chance of missing a label, as it's easy to see which have been installed.
- **Aligned with Production:** Our streamlined offering aligns with your existing production line, making the integration seamless and efficient.
- **Cost-Effective:** A cost-effective method for your labeling needs, reducing multiple production setups.

OUR COMMITMENT TO YOUR BRAND

FLEXIBILITY AND EFFICIENCY

- **Kit Customization:** Within a kit, you can still change a single or multiple labels on a sheet.
- **Digital Printing:** We use digital printing that's easy to rebrand, change according to new regulations, or create variable or serialized information.

FULFILLMENT AND COST SAVINGS

- **Time-Saving Application:** End-users save time during the application process, as all labels or decals needed for a specific piece of equipment are packaged together and easily accessible.
- **Reduced Setups and Overheads:** This cost-effective process reduces multiple production setups, eliminates misalignment of multiple decals, significantly reduces the number of SKUs, and prevents overlooking the application of a decal.
- **Storage Efficiency:** Reduces storage needs and overhead costs.

ALG Labels and Graphics specializes in the custom manufacturing of pressure-sensitive labels and decals, utilizing three primary printing processes. We deliver exceptional value with responsive service, high-quality products, and cost-effective production, especially through our kitting options.
